

Assignment-8

17/08/2023

1) Can we add any statements immediately after the break?

-> No, We can't add any statements. If we are willing to add means, it will display a bug called **“unreachable code”** and 1 quick fix available that is **“remove”**.

The break statement is the jump statements that is used to skip some statements inside the loop or terminate the loop immediately without checking the test expression.

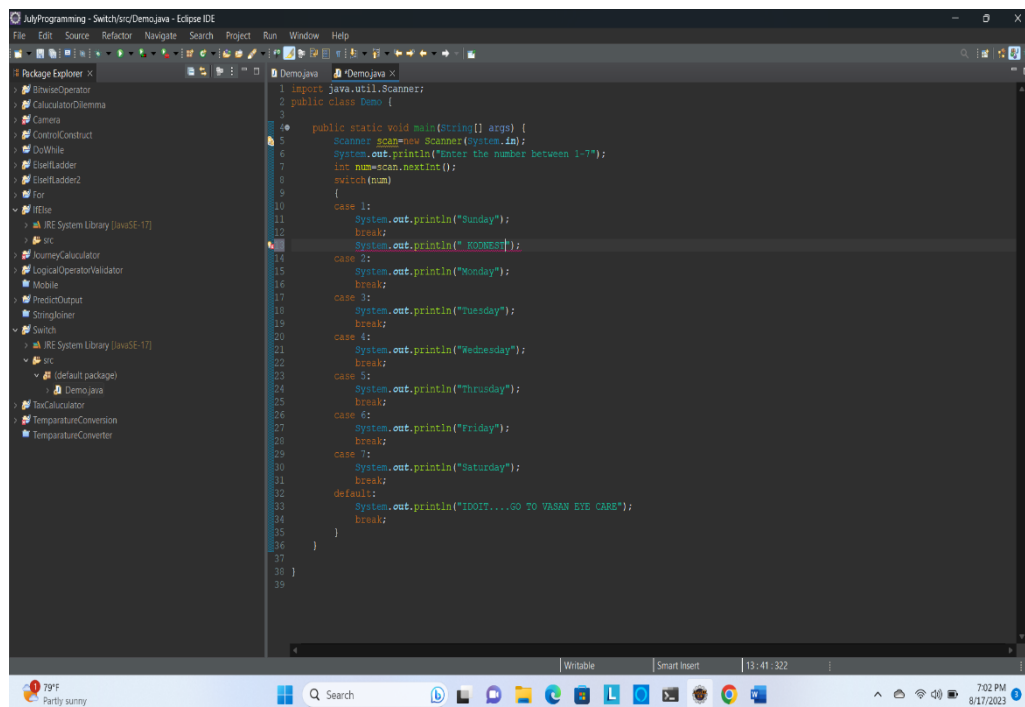

Fig: Error in break stmt

2) Can we add any statements immediately after the continue?

-> No, We can't add any statements. If we are willing to add means, it will display a bug called **“unreachable code”** and 1 quick fix available that is **“remove”**.

Basically continue statements are used in the situations when we want to continue the loop but do not want the remaining statement after the continue statement.

Fig: Error in continue stmt

Sir u told that u will give one more assignment of predicting the output but still not given. Waiting for your assignment.

THANK YOU SIR
