Labelled loop

A label is a valid variable name (or identifier) in Java that represents the name of the loop to where the control of execution should jump.

Can we print the labelled loop for do-while loop?

➔ Yes, we can print the labelled loop for all Looping Control Constructor.

Syntax:

```
abc:do{  
    xyz:do{  
        //stmt  
        break abc/xyz  
    }  
}
```

Example:

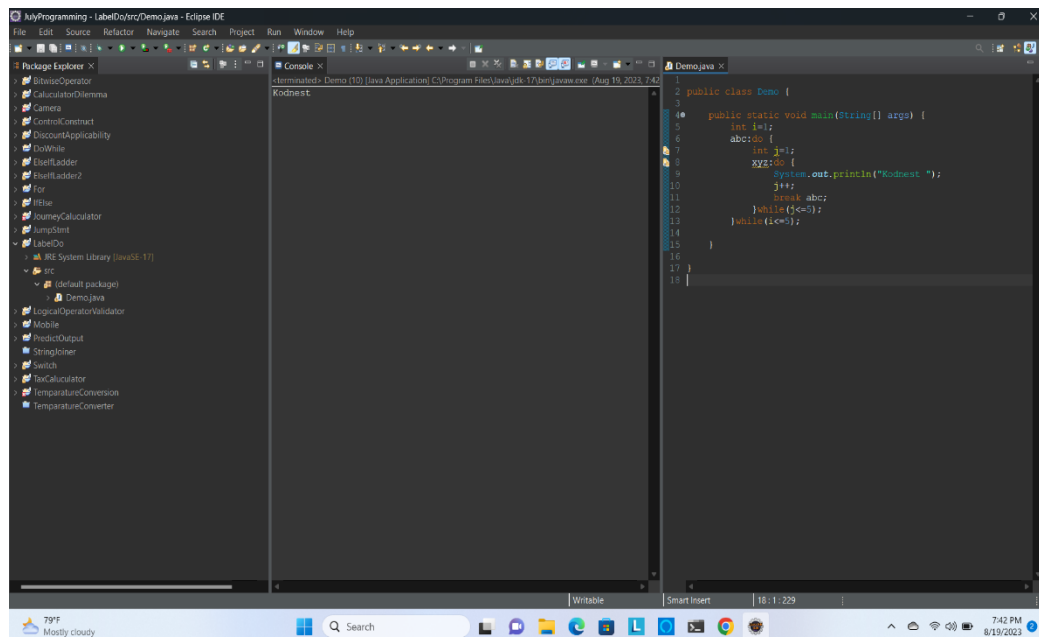

Fig: eg for do-while
